

A COMPLETE LINE OF INNOVATIVE PRODUCTS

MOBILIS
ELITE

ELECTRIFICATION OF TRAVELLING MACHINES

Manufacturers: performance and economy.

MOBILIS Elite has the advantage of high performance design without additional costs.

Thus giving manufacturers a competitive edge in development and marketing : more competitive assembling, maintenance and use.

Installers : simplicity and flexibility.

Thanks to its limited number of parts, the systematic use of easily removed connections, and rapidly fitted accessories (without tools), MOBILIS Elite offers installers a system which is simple and quick to set up, whatever the location.

Users : security and reliability.

As well as complying with standards and regulations in force, MOBILIS Elite stands out for its hard-wearing qualities and ease of maintenance, thanks to the use of tool-free fitting of accessories.

Accessories quickly fitted and removed.

For easier fitting and maintenance, the main accessories have been designed for simpler, quicker, tool-free installation. The feeding box and covering flange are clipped on manually. However, they cannot be removed without the use of a tool, in accordance with regulations.

Connection using removable self-breaking screw.

A patented principle of self-breaking screws allows controlled fixings with complete security and reliability. In addition, an improvement makes a later removal easier.

- During fitting of line elements, the self-breaking screw ensures optimum tightening torque for each fixing : once torque is achieved, the screw breaks.
- When the screw breaks, a second hexagonal end appears. This makes subsequent removal easier, using a simple key.

Degree of protection: choose high performance.

MOBILIS Elite makes the user's choice simpler by offering a complete range of accessories, all ensuring protection of the line against rain (IP23), thanks to an integrated watertight system.

INNOVATION, SAFETY AND ECONOMY FROM 20 TO 200 A

Designed in co-operation with the Centre for the Plastics Industry in the Eastern France.

For the PVC casing, FELS designed a profile that meets all the requirements of a demanding specification, within the framework of a PUMA procedure (Procedure for the Use of Advanced Materials), in co-operation with the Centre for the Plastics Industry in the Eastern France and the Ecole d'Application des Hauts Polymères (Advanced Polymer Applications School).

Innovation is also aesthetic.

MOBILIS Elite offers ergonomics without forgoing aesthetics. Elegant lines, harmonious colours, and coordinated elements result in a product which is both dynamic and smart, all combining to make this rail an aesthetically successful innovation.

A range of temperatures for extended use.

- -20°C to +55°C for usual applications
- -20°C to +75°C if required.

FELS, specialists in electrical supply rails for over 30 years, has used its practical experience to good advantage. Its excellent knowledge of the specific demands of this type of product has enabled it to develop a new concept, full of technological innovation, both in terms of complying with regulations and in keeping with standardisation : MOBILIS Elite. This electrical supply rail meets all markets demands.

Fels Mobilis, the originator of the cellular structure.

Fels was the first to introduce optimised cellular structures for the Mobilis range, thus giving an excellent rigidity to the PVC profile. The casing is both light and strong and holds either 4 or 5 conductors. Its narrowed lower opening prevents any accidental contact with the inside.

Removable Carbons: a MOBILIS Elite exclusive.

MOBILIS Elite has taken maintenance into account from the design stage. So the carbons, the main elements subject to wear, are easily replaced without touching the carriage wiring. They are simply unclipped using a screwdriver.

OUTSTANDING ADVANTAGES.

- **Performance :**
 - extensive range (20 to 200A)
 - light, rigid PVC profile
 - long lines without expansion joint
 - permanent modularity...
- **Security :**
 - protection index IP23 according to EN60529
 - self-extinguishing materials
- **Fast assembling :**
 - pre-assembled product (connection screws, protection lips...)
 - clip-on accessories (tool-free installation)
 - connections through self breaking screws
- **Easy maintenance**
 - carbons removable
 - easy removal of connections
- **Modern design**

1 LINE ELEMENT

Self-extinguishing PVC
Standard length 4m, 3m, 2m, 1m
Special length on request
Max. rated operational voltage : 750 V

3 END-LINE FEED BOX M25/M32/M40

Thermoplastic
Self-extinguishing - IP 23
Intensities 20, 40, 60, 100A
Possibility PG outgoing down
Collector trolley inaccessible zone : 35 mm
Weight 0,4 kg

Please provide cable eye stiffeners Ø 5 for connection

PE	Dimension A	Dimension B	References	cable ø
M25	181	126	ME 1200	13 to 19 mm
M32	183	128	ME 1230	15 to 25 mm
M40	186	132	ME 1250	21 to 32 mm

IN-LINE FEED BOX M40

For the intensities 20, 40, 60 and 100A - IP23
Cable ø 21 to 32 mm - Weight 1,5 kg
References : (4P) ME1332 - (5P) ME1329

IN-LINE FEED BOX M25/M32

Thermoplastic - Self-extinguishing - IP 23
Intensities 20, 40, 60, 100A - Weight 0,3 kg
Please provide cable eye stiffeners Ø 5 for connection

TRIPLE TROLLEY

5 SLIDING HANGER

Galvanized steel
Screw M8 pre-mounted
2 pieces for a 4m element
Weight 0,1 kg
Reference : ME 1510

6 FIXED HANGER

Galvanized steel fully assembled
Delivered with 2 anchoring screws
Weight 0,1 kg
Reference : ME1500

7 CARRIER

Fixing on a square bar 20 to 50 mm

Admissible clearance: horizontal +/- 50 mm; vertical +0/-50 mm

Simple carrier for simple trolley
Weight 0,6 kg
Reference : ME1600

Double carrier for double trolley
Weight 1,1 kg
Reference : ME1610

Triple carrier for triple trolley
Weight 2,6 kg
Reference : ME1630

CARRIER WITH BOX

Simple : terminals 16 mm²
Double : terminals 25 mm²
Triple : terminals 25 mm² } cable ø : 22 to 30 mm

Type	References		FM 35° C	A	B	C	Weight

8 FIXING BRACKET

Galvanized steel

For intensity 200A, please only use ME1760 and ME1780

References	Length L	Section A x B	Weight
ME1700	380 mm	15 x 20 mm	0,5 kg
ME1750	500 mm	15 x 20 mm	0,6 kg
ME1760	600 mm	30 x 30 mm	1,0 kg
ME1780	850 mm	30 x 30 mm	1,2 kg

Please also enquire for our fast assembling clamped bracket reference ME1799

9 END CAP

Thermoplastic
Self-extinguishing - IP 23
Collector trolley inaccessible zone : 35 mm
Weight 0,3 kg
Reference : ME1400

SWITCHING FINGER

Galvanized steel fully pre-mounted
Rod length : 400 mm
Diameter 10 mm
Weight 0,570 kg
Reference : ME1550

OUR RANGE ALSO INCLUDES

- **Inlet gates** : enable the insertion or removal of collector trolleys for maintenance.
- **Curves** : available from 0,800 m minimum radius.
- **Protection lips** : flexible seals fitted to the running slot in the profile to prevent ingress of dust or moisture in harsh environments.
- **High speed trolleys** : for applications with speeds exceeding 100 mts/min.
- **Articulated trolleys** : for applications with curves.
- **Cleaning trolleys** : fitted with brushes to clean the conductors in harsh environments, or outside.
- **Ventilation elements** to avoid the condensation between a warm section and a cold section.
- Elements with **circuit interruption**.
- **Transfer elements** for switches.

MOBILIS MOVIT® : ELECTRIFICATION LINE WITH SINGLE POLE CONDUCTOR RAILS 315A - 450A - 630A

As a leading specialist in electrical power supply, FELS is broadening its MOBILIS range with a highly innovative line of single-conductor rails boasting an unrivalled aesthetic quality.

Designed in the same spirit as the multi-pole conductor rail MOBILIS ELITE, MOBILIS MOVIT focuses on three key features :

- simplicity, in terms of transport, assembly, maintenance and dismantling ;
- safety, by taking into account installation and service conditions as well as respecting standards and regulations ;
- reliability, for optimum customer satisfaction.
